Sathish Udhayakumar

Senior Product Designer

I lead design for Krane's AI products, from research to handoff, and set the rules for when its agents act and when they ask. Ten years in construction: five on site, five designing for it.

Open to new product design roles · remote or on-site, any location

AT A GLANCE

10 yrs in construction: five on site, five designing for it

3 Krane products shipped in 2026

15+ features shipped at Powerplay

50+ research sessions with site and office teams

EXPERIENCE

Krane — Senior Product Designer — Mar 2025 - Present

US-based AI platform for construction procurement · Remote · Sole designer Mar 2025 – Sep 2026, then with a design partner

- Led the design strategy for Krane's AI agents: mapped where agents help and set the rules for when they act or ask. It became the base of **AutoLog V2**.
- Led AutoLog, an AI tool turning 500+ spec pages into procurement logs, from support-run to self-serve: about 10× more weekly customer users after V1.5.
- Redesigned Submittals (shipped): merged three pages into one and replaced an unexplained "Critical" label with deadlines users can inspect.
- Merged two delivery products into one Delivery Board; within weeks, 9 in 10 delivery visits moved to it. Designed material–delivery linking, now live.
- Set up Krane's first design tokens and type choices, which the unified platform proposal built on.

Powerplay — Product Designer — Sep 2021 - Mar 2025

B2B SaaS that construction companies use to run their projects · Bengaluru

- Shipped 15+ features, from field reporting and BoQ to material flows and dashboards.
- Led the **field app from zero to one** for workers with low digital literacy, shipped on Android.
- Ran 50+ research sessions with site and office teams; they shaped the field app, BoQ and daily report.

BEFORE DESIGN

ESS Construction · R&D Project Manager — 2019 - 2021

OEMCONCRETE · Quality Assurance Specialist — 2017 - 2019

SSS Construction · Site Civil Engineer — 2016 - 2017

SKILLS

Lead	Design strategy for AI agents, cross-functional direction, decisions by prototype
Design	Product design, information architecture, design systems
AI	Agentic workflows, human-in-the-loop review, error and confidence states
Research	User interviews, workflow analysis, product analytics
Tools	Figma, FigJam, Mixpanel, PostHog, Linear, Jira, Notion

EDUCATION

Karpagam University · B.E. Civil Engineering
